

Catalysing and Leveraging Innovation in Medtech Biodesign (CLiMB) Program

Promoting Global Affordable Need Driven Healthcare Innovation (GANDHlan) Approach

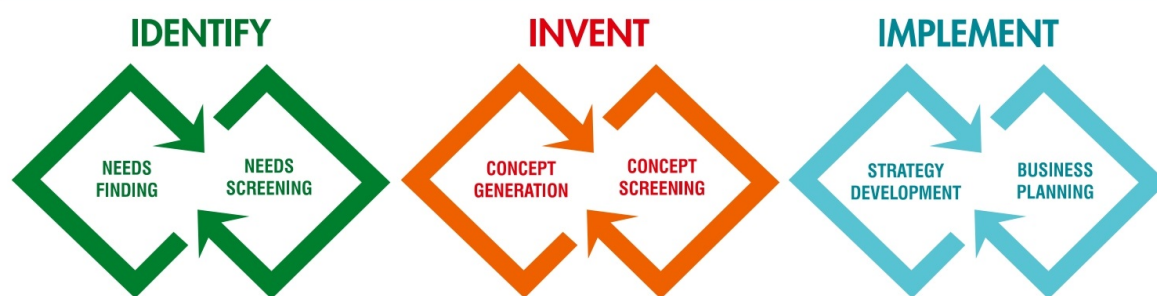

The CLiMB program aims to boost medtech innovation by nurturing entrepreneurs to develop innovative medical device & diagnostic technologies as per unmet needs of India through biodesign approach.

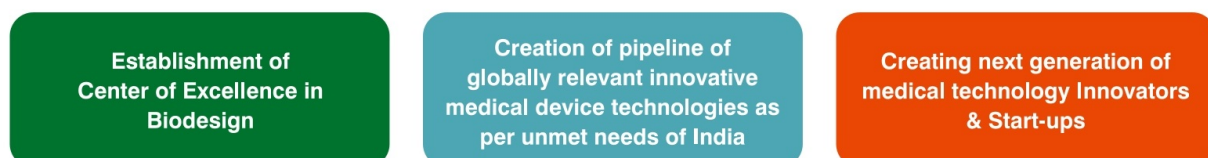

Its an inter-institutional collaborative program

implemented in collaboration between medical and engineering institutes involving experiential training and product development by multidisciplinary team of doctors, engineers, product designers and business management professionals.
